KITCHENS

# Kinetic kitchens

Folding, sliding, twisting, turning, rising, and disappearing and reappearing at the push of a button, flick of a switch or slight touch of hand - these metamorphic kitchens transform to reveal two very different looks in the same space. Their moving elements allow you to have a highly functional kitchen for preparation and cooking, but also a sleek and attractive minimalist alternative, ideal for when you are entertaining.

Bi-folding doors help conceal this Concept T45 Evo TM Italia kitchen. The doors, which are shown here in bookmatched Noce Canaletto veneer, can be opened independently to reveal either part, or your entire kitchen as required. The handleless island is in Grigio Tenda matt lacquer while the worktops are a combination of Eco Malta Cemento resin and Barazza stainless steel. Kitchens from £40,000.
